## Government Buying Sylvan Lake Beach For Public Property

From information received by Mr. G. W. Smith, M.P.P., it is quite likely that the Provincial Government will purchase the land lying between the road and the lake front at Sylvan Lake. This action is in line with the Government's policy of preserving the beaches at the lakes for the public, and will be good news for the people of Red Deer and Sylvan Lake. The Government is also contemplating the purchase of a five-acre block at the lake for a parking site.—Red Deer Advocate.

The girls of the Y.W.C.A. surprised Mrs. F. Finlay with a handkerchief shower Thursday afternoon last. Mrs. Finlay was the girls' former superintendent and is leaving shortly for Africa. Miss Z. Cressman then read an address to which the recipient gave a suitable reply. After spending the remainder of the evening in games the girls served a light lunch.

## OBITUARY

Mrs. Ella Meeker, widow of the late David Wade Meeker, passed away at the home of her daughter, Mrs. W. A. Swingle, Didsbury, on Sunday morning, September 15, 1929.

Mrs. Meeker was born in New Hampton, Iowa, March 31, 1857. Losing her parents in early childhood, she lived with her grandparents, Mr. and Mrs. McCord, who passed their last years with her in Alberta. They later moved to Waverly, Iowa, where most of her girlhood was spent. On November 22, 1887, she was united in marriage to David Wade Meeker. To them were born two daughters, Mary and Julia.

They moved to Alberta in 1900, homesteading eight miles west of Didsbury where they lived till Mr. Meeker's death on February 13, 1914. She then made her home with her daughter, Mrs. W. A. Swingle, with the exception of the past two years spent in Spokane, Wash. While here on a visit, after a short illness the end came.

Mrs. Meeker leaves to mourn her loss, two daughters, Mrs. W. A. Swingle, Didsbury and Mrs. H. Jennings, Spokane. The funeral services were conducted by the Rev. Duprose in the Westerdale United Church, interment taking place in the Westerdale cemetery.

Flowers were sent by the following: Melvin School District; Westerdale Ladies Aid; the King family, Cochrane; Rugby Women's Institute; Mr. and Mrs. W. A. Swingle and family; Mr. and Mrs. O. R. Swingle; Mr. and Mrs. O. O. Swingle; Mr. and Mrs. H. Ross; Mr. Chas. Foss and Vivian; Mr. and Mrs. H. E. Sarette, Spokane, Wash.

Mrs. Roppel conducted the preaching service in the Ev. Church at Westcott last Sunday afternoon, while Rev. Roppel also held a service at Sunnyslope at the same hour.

## Trade in your OLD HAT —at Berscht's

We will allow you

**\$1.00**

FOR YOUR OLD HAT on any of our new hats from Saturday, October 5 to Saturday, October 12, inclusive.

Our stock includes the famous Biltmore Hats. Priced from \$3.00 to \$5.50. All the latest styles and shades to choose from.

No matter what model your hat is or how far it has gone, we will allow you \$1.00 for it on a new hat. (Only one hat taken in on a new one.)

"WHERE QUALITY AND PRICE MEET"

## A.M.A. Campaign For More Highways Showing Results

The campaign being carried on by the Alberta Motor Association for better highways and more highways in this province is proving full of justification, if one but looks at what is being done both on the eastern and western sides. In British Columbia, announcement was recently made of a project to build a motor highway from a point near Vanderhoof, west of Prince George, for 85 miles in a northerly direction to Manson Creek. Ultimately this road will extend to Finlay Forks, while another extension planned is as far north as Fort Grahame.

This new highway in northern B.C. will not be completed all the way to Manson Creek this year, but a great deal of it will be done. Engineers are already on the ground and preliminary work is underway. This road will pass through a highly mineralized country, as well as one of scenic beauty, providing a route that will in later years draw many tourists. It again proves the necessity of Alberta linking up with all possible speed with British Columbia in the building of automobile roads. The highway to Peace River would form the Alberta link with this new road for the coast province.

In the south it is reported that an agreement has been reached between Hon. Charles Stewart, Minister of Interior, and Premier Tolmie, of British Columbia, under which the highway between Golden and Revelstoke will be completed. Hon. Mr. Stewart stated recently that while this would mean a route 90 miles longer than the originally projected one, it would be free of the dangers of snowsheds. As the road will run around certain lakes in the vicinity, some heavy construction costs cannot be avoided.

With this road built, there will be an additional link between Alberta and British Columbia, while a big step will have been made in having a national highway across the Dominion.

Saskatchewan is also going ahead this year with a heavy roads program, which will mean that links with Alberta will be established with the east. It all goes to prove that with road builders active on the eastern and western fronts, Alberta should operate and maintain an extensive highway system which should be enlarged from year to year.

## LOCAL & GENERAL

Mrs. Minnie Winfield of East Calgary is visiting with Mrs. Dave Irwin this week.

Morgan Cressman informs us that his Ruby wheat threshed out No. 1 and yielded 30 bushels to the acre.

Don't forget the track meet at the fair grounds on Friday, October 4, starting at 11 o'clock sharp. A small admission will be charged adults to help defray expenses.

Mr. and Mrs. W. G. Liesemer and Mr. and Mrs. G. H. Liesemer motored to the Turner Valley Oil Fields on Sunday. Mr. and Mrs. Lee Sanderson were Didsbury visitors to the oil fields Sunday.

Rumor is ripe that the oil out west is next in the limelight for drilling for crude oil operations. It is reported also that Mr. Hoegan Petersen has been awarded the contract by a well-known oil company, for hauling drilling equipment to a spot at or near the old Monarch well, to be completed by October 15th of this year. Owing to Mr. Petersen being on a business trip to Calgary the forepart of this week, we were unable to get the widespread report confirmed.—Olds Gazette.

## School News

On account of the heavy enrollment in Grades 5 and 6 in the Didsbury Public School it has been found necessary to rearrange the grades which are being taught by the various teachers.

There have been no promotions or demotions of any of the pupils and each part of the divided grades will have the same opportunity to make the next grade.

C. R. Ford, Principal

## DIED

Monday, September 30, 1929, at Didsbury, Henry E. Weber, aged 76 years, 6 months and 26 days. The funeral services will be held at the Evangelical Church, Didsbury, Thursday, October 3, 1929.

## HOSPITAL NOTES

The Matron of the Didsbury General Hospital wishes to thank the Rugby and Community School Fair committee for the veg tables donated to the hospital, the Rugby W.L. for \$175.00 for furnishings and the boys who donated the proceeds of the dance held Friday.

## BIRTHS

To Mr. and Mrs. W. M. Smith, on September 28, 1929, a son.  
To Mr. and Mrs. C. Brightman, on September 23, 1929, a son.

On Saturday, October 19, the Olds taxpayers will vote on a by-law to authorize the town council to borrow \$10,000 for the purpose of building a covered rink.

## Army Of Motorists Hot On Trail Of Road Workers

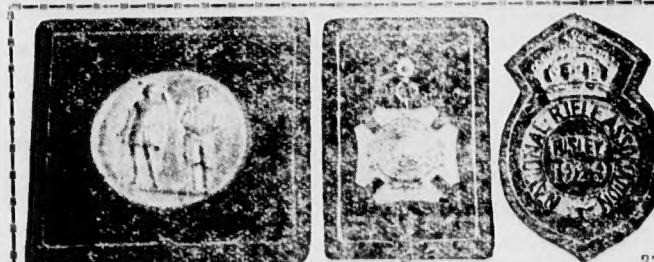

Right in the wake of the road builder, the motor tourist, settler and sight-seer now take full advantage of the opportunity to see as much of this province as possible during the driving season. Road hazards are challenged, while bad weather has no disheartening effect on these motorists whose aim is to penetrate as far as possible into new areas of farming wealth and scenic beauty in this fair province.

During this season, traffic on the new highways being built into the Peace River district and to Jasper national park demonstrated the faith of motorists in efficient road building in Alberta. On the Peace highway as many as 50 cars a day have passed through some points, showing the volume of traffic. This highway is not yet on the tourist route by any means, and motorists are not being encouraged to drive over it until the new grade becomes settled.

The same story of pioneer automobile comes from those living along the Jasper highway, between Edmonton and that popular tourist resort. As many as 15 and 20 cars a day have been seen on this road, though it is not yet in a finished stage.

The growing traffic on unfinished roads in the province is still another clarion call to the provincial government to expedite its highway building program.

## Welcome Bisley Victor Home

Lieut.-Col. R. M. Blair, champion rifle shot of the Empire, welcomed home on board Canadian Pacific Steamship Duchess of York by Dr. A. M. T. Waylen, immigration health inspector. The trophies won by Col. Blair are pictured below and are from left to right: The most coveted shoot-

ing trophy in the British Empire—the Gold Medal awarded to the King's Prize winner; the Grand Aggregate Gold Cross, also won by Col. Blair, and the National Rifle Gold Badge. He was also presented with a much-prized autograph photograph of His Majesty King George V.

Every package of Red Rose Tea is prepared with the same care—as if our reputation were to stand or fall upon that single package. 73

## The Progress of Little Things

In these modern days when it is "the thing" to boast about the bigness of this and that, and when countries and cities lay claim to the possession of the biggest of something or other, we are apt to forget how many of these "big" things were brought about, and to lose sight of the essential fact that anything "big" is in reality only a collection or combination of many very small things.

Nowadays not so much stress is laid upon old sayings of a couple of generations ago, such, for example, as "Mighty oaks from little acorns grow!" nor do we stop to contemplate that this globe on which we live is after all made up of "little drops of water, little grains of sand."

It would be better for everyone of us if we gave greater heed and attached their real importance to the little things of everyday life. The wealth of the multimillionaire is, after all, only an unusually large accumulation of pennies, and some of the very rich men of the world aid the foundation of their wealth by careful saving of their pennies. The hundreds of millions of bushels of Marquis wheat harvested in Canada every year is the result of one little kernel developed by Dr. Saunders.

The investment of a very few dollars by the parents of a baby at the time of its birth, if left to accumulate at compound interest throughout the years of its minority, would mean a very substantial sum of money upon which to commence a career in the world by the time the child became of age.

These thoughts come to us when reading a recent article about Trinity Church, in New York City. This church, which stands at the head of Wall Street, the centre of New York's financial district, began its career 233 years ago on a precarious income derived from the flotsam and dead whales cast up by the sea along the shore where one of the world's largest cities now stands. Today Trinity Church Corporation is one of the largest holders of real estate in that city, owning \$15,000,000 of revenue producing real estate, bringing into the church coffers almost \$1,500,000 a year. Nor do these large figures include the value of the property upon which Trinity Church itself stands, the equivalent of about two square blocks in the heart of the financial district, and conservatively valued at another \$15,000,000.

The tremendous wealth of Trinity, we read in the Wall Street Journal, would appear fantastic to the organizers of this church in 1696, when King William III. made the original grant of land to the parish, supplemented nine years later by a further grant from Queen Anne. In those days the and was of no particular value, Wall Street was non-existent, and Fifth Avenue not even a foot path. But Manhattan Island was destined for great wealth, and the worthless property of a little over 200 years ago is worth many millions today.

Historical records contain efforts to obtain funds to start the church, which appear incredible when contrasted with present day values. One aid to the building of the original church in 1696 was a patent issued by the Governor of New York. It permitted vestrymen to seize all drift whales, or anything else driven by the sea onto land, and for which there was no owner. It further directed that the whales be towed ashore, fried, and proceeds used for a building fund.

The lesson of this interesting bit of history is this: Today there are thousands of young people just starting out in life. They have little or nothing. With them it is indeed a day of small things, and as they look around them and see so many huge undertakings, great enterprises, and the speed of the modern world, they are inclined to be discouraged, and become obsessed with the false idea that there is no opportunity for them.

But opportunities exist today as never before. There are a thousand today where there was but one two hundred years ago. The beginning must be small now, as it was then, but the opportunity is there just the same, while the possibilities and probabilities of growth are many times more rapid now.

Tackle the small thing at once; save the small things, the pennies; watch for and embrace your opportunities; conserve those things which come to you. The bigger things, and the rewards of work and of service to your fellowmen will follow in due course.

### Firebrick and Fireclay Products

Firebrick and fireclay shapes are produced, both from domestic and imported clays, in Nova Scotia, Quebec, Ontario, Saskatchewan, Alberta, and British Columbia. Refractory silica bricks are also produced in Nova Scotia and Ontario.

"Excuse me," said the impatient man at the table to the manager, "but did the waiter who took my order leave any wife or family?"

You seldom find the name of the fellow who thinks he's "it" in Who's Who.

# Acid Stomach

Excess acid is the common cause of times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

### Story Of Privation

#### Tragic Case Of Two Boys Lost In Woods Of Northern Quebec

How 12-year-old Michael Courtois remained for nearly two months beside the body of his brother, Rene, 19, dead from hunger and privation in the woods, and how the two of them had wandered for miles, famished and helpless, was described at Roberval, Quebec, at the inquest into the death of Rene Courtois, found dead in the woods of northern Quebec, after having been missing since August, 1928.

Roots, berries and fish bones furnished slender means of livelihood for a time, young Michael told the coroner's jury. They were four hundred and fifty miles from Roberval, the nearest outpost of civilization. Having but two matches, they kept a fire burning in a pall for two months. When the search party found them, the fire was still smouldering but Rene Courtois was dead.

Michael had almost completely lost his reason when rescued, but it is now completely restored, though he is a physical wreck.

The boys were lost when their father left them at his cabin while he undertook a hunting trip. They wandered from the camp.

The coroner's jury returned a verdict, "death by starvation and misery."

### FEELING WORN OUT

#### When the Blood Becomes Watery a Breakdown Follows

How many girls and women suffer from headaches, pain in the back or side, poor appetite, nervousness and a constant feeling of weariness and palpitation of the heart at the least exertion. Of course, all these symptoms may not be present in any one case, but any of them show that the blood has become thin and watery, and good health can only be regained by enriching the blood. This should be done without delay. For this purpose nothing else acts so promptly and so surely as Dr. Williams' Pink Pills. Every dose helps to enrich the blood and tone weak nerves and thus brings new health and vitality to weak, and often despondent people. The truth of these statements is proved by the case of Mrs. Howard King, R.R. 5, Truro, N.S., who says: "A couple of years ago I grew so weak I could scarcely walk across a room without help. My blood was thin and I was almost breathless. I had taken Dr. Williams' Pink Pills on a former occasion with good results, and so decided to try them again. By the time I had taken a few boxes I felt much better, but I continued taking the pills for several months, by which time I could walk for miles with little effort. I do all my own housework and care for four children, so you will see what Dr. Williams' Pink Pills have done for me."

You can get these pills through any medicine dealer or by mail, post paid, at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Gratifying Progress In Tree Planting

The 1928 reports of inspectors of the tree plantations made on prairie farms with trees furnished by the Forest Service of the Department of the Interior from their nurseries at Indian Head and Sutherland, Saskatchewan, show that 83 per cent. of the plantations inspected were found to be in very good condition, 14 per cent. were fair, and only 3 per cent. were in poor condition.

**Rub It In For Lame Back.** — A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

### Alberta Calves For Dakota

#### Alberta's Flying Rancher Receives Order From North Dakota State University

George Ross, southern Alberta's flying rancher, has received an order from North Dakota state university for 1,000 calves to be distributed by the university to boys' and girls' baby beef clubs throughout the state as part of a movement to encourage more and better livestock production.

The calves will be delivered during October, and after distribution, will be fed up during the winter for spring stock shows in North Dakota.

Kill that corn with Minard's Liniment.

W. N. U. 1803

"THE most beautiful black you've ever seen!" "All my friends admire my new black silk!" "The coat I thought was hopelessly spotted is now a new, beautiful black!" These are typical comments from women who have used these true, jet black dyes.

Diamond Dyes Black never gives cloth a greenish or brony look, as so many black dyes do. Like Diamond Dyes Red and all the other Diamond colors, it is easy to use and gives such beautiful results because it is rich in pure anilines. It's the anilines in dyes that give them brilliance, depth and fastness; make them go on smoothly and evenly, without streaking or spotting. And Diamond Dyes contain the highest quality anilines that money can buy. The white package of Diamond Dyes is the highest quality dye, prepared for general use. It will dye or tint silk, wool, cotton, linen, rayon, or any mixture of materials. The blue package is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

### Diamond Dyes

*Sun Proof*

EASY TO USE-BETTER RESULTS

Diamond Dyes contain the highest quality anilines money can buy. And it is the anilines that count. They are the life of dyes; the source of their rich colors; brilliance and permanence.

### Ontario Research Foundation

#### Saskatoon Professor Will Go To Toronto To Engage In Research Work

Dr. Seymour Hadwen, research professor of animal diseases at the University of Saskatchewan, will leave Saskatoon for Toronto shortly for the Ontario Research Foundation as director of veterinary science.

This foundation is subscribed to jointly by a number of commercial firms in Ontario, and the Ontario Government. The chairman is Sir Joseph Flavelle.

Dr. Hadwen, who has been in charge of the veterinary research at Saskatoon since the laboratory for this purpose was opened, comes from Manchester, England. His research work on the effect of sunlight on white animals and the susceptibility of white cattle to attacks by parasites have attracted attention among scientific men and stock breeders. He has also made interesting discoveries with regard to the cause and method of the change of colour of the fur of wild animals in winter.

### Sunday Work In Russia

Sunday was abolished as a regular day of rest when the Soviet Government recently inaugurated in scores of trades and institutions a new "continuous production week." Employees will have their regular hours and rest-day, but work will be carried on continuously by others.

### Population Of Australia

#### Commonwealth Statisticians Show Increase During the Past Year

The population of Australia at December 31 last, was 6,336,786, an increase during the year of 1928, of 101,932, according to figures compiled by the Commonwealth statisticians. The corresponding estimate for New Zealand was 1,466,952, showing an increase of 16,862.

The state of New South Wales has a population of 2,455,280; Victoria state 1,760,689; Queensland, 916,689; South Australia 579,348; Western Australia, 405,873; Tasmania, 216,563.

The population of the six capital cities of Australia now totals 3,018,248.

Blood passes through the heart at a rate of about seven miles an hour.

### Boils

Dry up boils with Minard's. It's antiseptic qualities kill the poison and draw out inflammation.

## Group of Canadian Scientists To Study Resources of Frontier Districts To Aid the Pioneer

Considerable interest has been aroused here of late and throughout the continent of Europe in the settlement of Western Canada, says the Monetary Times and continues: Government circulars, railway advertisements, and British newspapers interested in the "New West" devote much space to picturing Canada as a land of opportunity. Wealth is represented as awaiting the daring European emigrant on the very threshold of Canadian soil. He learns that expansive prairies and great tillable plains await his plow-share and will insure him affluence and power. Disillusioned by these circular advertisements the believing immigrant has his hopes smashed by the outlook of frontier life. His new Canadian home is hewed out in an atmosphere that is full of disappointment.

The Canadian Government has brought many new settlers to Canada under the "assisted immigrant" plan. It is hoped that these families will settle on Canadian farms or will courageously dare the hardships of pioneer life. But in any case they are supposed to be agriculturists primarily.

A very distinct contribution toward improving the lot of the pioneer and gaining a more authentic knowledge of the location and resources of our frontier districts is being made by a group of Canadian and American scholars. The National American Research Council and Geographical Society have attempted a very comprehensive program. They hope to make a statistical and historical survey of the fringes of civilization, especially the pioneer belts. The plan is outlined by its farmers as follows. "A pioneer belt is a region of recent, progressive or potential settlement. In this study emphasis will be laid upon agricultural settlement, as well as the preceding forms of exploitation, lumbering and mining. The regions of primary interest are those possessing resources sufficient to support a socially tolerable and economically efficient population. The geographical focus is the temperate zone of either hemisphere and such subtropical areas as approach to a temperate zone climate."

The first region to be studied is that of Canada, supposedly because it is the most accessible. The study of this area aims to appraise its natural resources, to study methods of settlement with due regard to avoiding wastage of life and capital, and to trace the successive stages of utilization of natural resources and the resultant effects on economic and social institutions.

This phase of the project has been turned over entirely to an all-Canadian pioneer problems committee of which Dr. W. A. Mackintosh, professor of political and economic science, Queen's University, Kingston, has been named director. Other members will include: Dean W. J. Rutherford, University of Saskatchewan; Professor Chester Martin, Professor D. A. MacGibbon, University of Alberta; Professor D. A. McArthur, Queen's University; Professor C. A. Dawson, McGill University, and Professor R. W. Murchie, Manitoba University.

The research conducted by these experts will fall into four categories: Physical conditions (climate, topography and soil), agricultural eco-

mics (farm management and unit settlers' progress, and utilization of land and machinery); history and economics, and social structure. Their studies will cover the whole pioneer area of Canada, although concentrated on separate regions. The area is conveniently subdivided thus: (1) Quebec clay belt, (2) northern Ontario clay belt, (3) northern Manitoba, (4) southwestern Manitoba and southeastern Saskatchewan, (5) northeastern Saskatchewan and northwestern Manitoba, (6) prairie belt (i.e., the dry belt), including irrigated regions, (7) park belt, (8) forest soil area, (9) Peace River country, (10) foothills and ranching country (also ranching areas in British Columbia and Saskatchewan).

Although it is not intended to seek government aid, the Prime Minister and his Cabinet may be ready to cooperate with handsome grants to cover the more expensive stages of this project. Such disinterested and scientific study of man's relation to his environment and in general and with particular emphasis on the Canadian situation ought to win the enthusiastic approval of all who are interested in the destiny of this great Dominion.

DRAPE FLARE

A new silhouette for the youthful smart woman. It shows the raised waistline, a chic detail in all Paris frocks. The circular skirt in diagonal movement is draped at left side which is suggestive of wrapped treatment. Style No. 566 combines printed and plain cotton voile, the popular summer fabric. It comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The deep slender hip-line makes it suitable for the larger woman, by placing the circular fulness low. Chartreuse green chiffon, tomato red crepe de chine, yellow handkerchief linen, orchid and white printed lawn, purple aster georgette crepe, printed rajah in capucine tones, and sky-blue sheer lace are distinctly smart combinations for this charming afternoon model. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Rats Spreading Westward

## Precautionary Measures Are Advised To Check Advance Of Vermin

A matter of fifteen years ago rats had become a major nuisance in the Red River Valley. They seemed to come from the south, and the United States, where the annual damage from rats is estimated at \$200,000,000, got the blame for the invasion. For some mysterious reason the rat menace vanished. There are still rats in the province, but the trouble they cause is relatively slight. Now it is Saskatchewan that is complaining.

The rats are moving westward across the neighboring province. Four years or so ago rats were only found east of the line through Lampman, Broadview, Springside and Peaceville. At the end of 1928 they had reached Regina, Willowbunch, Lanigan and Watson.

It is the rat that spreads the bubonic plague, and precautionary measures are being advised to check the spread of the vermin. Modern farm buildings on concrete foundations are ratproof, and by means of screening low-lying windows and chutes much can be done to keep them out. It is worth while taking such measures everywhere to prevent them getting a hold.—Manitoba Free Press.

## Fish Meal For Stock Feed

## B.C. Product May Be Shipped To Prairie Provinces

As a means of building up the health of Western Canadian cattle, the British Columbia Government is encouraging the use of fish meal as feed. The fish meal is manufactured from pilchards which are caught in millions off the west coast of Vancouver Island.

According to Hon. S. L. Howe, commissioner of fisheries, it has been shown that calves fed on a ration of fish meal had at the end of a year an average height of two and a half inches in excess of the standard, and an average weight of 30 pounds in excess of the standard weight. He added that herds fed on a ration of fish meal are free from goitre and abortion, and that cases of bovine tuberculosis are relatively unknown among cattle so fed.

## May Soon Need Certificate

The time is coming when the motorist who applies to renew his license will have to present a certificate from an approved garage to show that his car has been inspected and found in good shape. Until there is some such safe-guard there will not be a proper assurance that the highways are safe from an unnecessary source of danger.

Eternal triangle love, marriage and divorce.

## C.N.R. OFFICERS PROMOTED

Officers of the freight traffic department of the Canadian National Railways prominently concerned in the recent retirements and promotions are shown above. They are: (1) J. M. Horn, who has been promoted Assistant Freight Traffic Manager, Winnipeg; (2) J. M. Macrae, who has been appointed General Freight Agent, Vancouver; (3) W. Hately, who becomes General Freight Agent, Winnipeg; (4) A. E. Roseyear, General Freight Agent, Winnipeg, who, on Dec. 15th, retires after 52 years of service, and (5) F. G. Adams, Assistant General Freight Agent, Winnipeg, whose duties are enlarged to give him supervision over rates and divisions.

## Promising Future Is Predicted For Port Churchill, Soon To Be Centre of Great Activity

## Alberta Crops

## Forty Bushels To the Acre Reported In Peace River District

Those who have supposed that there were no good crops of grain in Central Alberta this year, will be interested to learn that a Wetaskiwin farmer, Mr. Gustave Elgert, has been awarded the provincial championship for the finest field of wheat in the province. A day or so ago Premier Brownlee told us that there are crops in the Peace River district which are calculated to yield 40 bushels to the acre. Last week a report from the south stated that in the extreme southwestern corner of the province yields running up to the same figure were expected. The field crops competition in which Mr. Elgert won was open to entries from any part of the province, and entries were actually made in districts all the way from the Athabasca River to the international boundary. To win under these conditions the prize field must have been good, not only by comparison, but by the standards which apply in a normal season.—Edmonton Bulletin.

## Railway Accidents Reduced

## Reduction Of Fifty Per Cent. Is Noted In Past Four Years

In the past four years the railways of Canada and the United States have decreased accidents by 50 per cent, according to figures brought out at the sessions of the American Railway Association safety section, Canadian branch, which have just closed at Montreal. Four years ago, the railways set themselves the goal of cutting accidents 35 per cent. by 1930.

In a year less, they have accomplished 50 per cent. "The railways," a speaker said, "are doing their part. The public is being educated too, but there are still too many people who insist on being negligent."

"Unless the public co-operates and learns the rule of 'safety first,' we must still have accidents, no matter to what lengths we go to protect."

Dear Old Lady (at village grocer's): "Young man, I should like to try a pound of traffic jam—they're been so much about it in the papers lately."

She—I wonder why they put corn meal on the dance floor.

He—Oh, that's to make the chickens feel at home.

Colonel Dubuc, chief engineer of the Department of Railways and Canals, and D. W. McLachlan, engineer in charge of the Hudson Bay Terminals, have returned to Ottawa from a tour of inspection of the railway and harbor works at the Bay. The engineers report excellent progress, although they say the port will not be ready for business for two or three years. Nevertheless Churchill is attracting residents, and already three of Canada's leading banks have established branches there. Furthermore, every time a report goes out of progress on the railway, there is a rush of barbers, bakers and other workers to the new port. There are 2,500 men at work on the railway line and 500 at the harbor, making a community of quite respectable size. The idea Churchill is a forbidding centre for settlement is disappearing. Last winter, work was pursued on the railway, although the thermometer went down to 50 or more below zero at times. The men engaged were hardy pioneers, and on the railway they are building, the workers and small business men of the future town will ride in comfort to the new port. Cold in winter and extreme heat in summer do not deter settlement in Canada's north; witness the Yukon, far to the northwest of Churchill, where Dawson is a happy community, many of whose dwellers live in flower-covered houses and drive their motor cars over highways that were a quarter of a century ago foot trails to the gold-laden creeks of the Klondike.

Dominion of Canada maps show that gold is located in many sections south of Churchill, and iron and coal and other minerals. Big and small fur-bearing animals abound, the caribou being much in evidence; water powers are awaiting development and there are areas of pulpwood, all marked on the map. Polar bears may swim about among the iceflocs right down to where the port works are in progress and whales blow and wallow at the front door, as it were, but there are other more promising signs not far inland. The lakes and rivers of the region teem with fish, and the Indians make a living with the Red Man's minimum of effort. United States and Canadian experts declare that colder weather has been experienced in the centre of Manitoba and as far south as Montana than in Arctic Circle, which is much farther north than Churchill. Stefansson insists that away up in the Arctic, where vast islands and many seas are in evidence, a man may exist comfortably—that the Arctic is friendly, in fact. However that may be, it is certain that Churchill is due to become one of Canada's northern communities, and that neither extremes of cold nor heat will keep adventurous spirits from going there in search of a livelihood. Settlement is moving towards the northern boundaries of the provinces whose territories stretch towards the Arctic regions, from Quebec to British Columbia. Montreal Gazette.

Anxious Father (to friend): "I can't make our Tom out. He's a funny lad. I've taught him all I know and now he knows nothing."

"So you won first prize in the lottery? How did you come to choose No. 20?"

"I chose the number corresponding to my age."

"I must try that."

"I wouldn't in your case—No. 35 never wins."—Karikaturen, Oslo.

**FALL WEED WORK**

A number of municipalities have this year deviated from their customary practice of discharging the weed inspector at the start of the harvest by retaining the services of these officials until freeze-up. At the present time it is their duty to check up on the threshermen, see that they are complying with all of the regulations laid down in the Act governing the operation of threshing outfits, preventing the carrying of weed seeds from farm to farm on bundle wagons and other vehicles, and insisting upon the immediate disposal of weed seeds left around the straw stacks.

The most energetic summer weed campaign possible falls flat if it is abandoned with the first hum of the binder. More weed seeds can be distributed during the harvesting season than can be coped with during the growing season by the most ambitious weed inspector in the service, and it seems regrettable that more local organizations have not seen the force of this in days now past. The logical time to get the weeds is not after they start to grow, but before they are seeded, and there is no better opportunity to dispose of vast quantities of them than at the time they are removed from the grain.

The localities possessed of sufficient judgment to keep their weed inspectors on the job are well served. Results will be evident when vegetation shows green next spring, and if the work is properly carried out this fall the few extra dollars going into the inspector's pocket will turn out to be a very profitable investment.

Running a newspaper is just like running a hotel—only different. When a man goes into a hotel and finds something on the table that does not suit him, he does not get up and tell the manager to stop his darned old hotel. Well hardly. He sets that dish on one side and wades into some other dish. It is different with some newspaper readers. They occasionally find an article that does not exactly suit them and without stopping to think it may please hundreds of other readers, make a grand stand play of their supreme assinity and stop their paper.

**ITS APPEAL IS UNIVERSAL**

Some more than others, but all to a degree, like to wander through stores. Man has been doing it so long it seems almost instinctive. Perhaps the explanation for the universal appeal of the store counters lies in an innate love of possession and of anticipation of possession. People are forever window-shopping, looking around-the-store with all the breathless expectancy of children on Christmas eve. They want something which they hope sometime to find in store made to their own order and to their price, or they are just interested in the things man is creating for man.

Not less irresistible is the newspaper with its columns of advertising. In these columns are found the same wonders and coveted merchandise that are found on the store counters. Only the "catalogue and counter" combined in the newspaper advertising pages offer some advantages peculiar to themselves.

Every day millions of people the world over peruse the newspaper advertisements to inform themselves on

**LOCAL & GENERAL**

Mr. E. G. Ranton was a business visitor to Red Deer yesterday.

Mr. and Mrs. Ted Brown were visitors to Calgary Tuesday afternoon.

Mr. Kenneth Robinson of Edmonton has joined the staff of the Royal Bank.

Don't forget the big dance in the Didsbury Opera House, Friday, Oct. 11. Bellamy's Orchestra.

Mr. and Mrs. John Eubank and son John motored to Edmonton on Saturday, returning home Sunday.

Mr. and Mrs. Frank Kaufman accompanied by Miss A. Pelechaty and Mr. Ward Wyman motored to Turner Valley on Sunday.

Mr. and Mrs. J. D. Eamor of Vulcan were visitors at the home of the former's cousin, Mrs. E. Marcellus, over the week end.

Mrs. L. Maddocks of Stavely is visiting for a time at the home of her daughter, Mrs. W. H. Chamberlin.

Mr. Ira Stauffer, having spent the spring and summer in the Acadia valley district, returned home by motor Monday evening.

The local C.G.I.T. group will hold a tea and sale of home cooking in the United Church basement, Saturday, October 12, from 3 to 6 p.m.

A hurricane of howls! Lew Cody and Aileen Pringle in "The Baby Cyclone," at the Didsbury Opera House, Saturday, Oct. 5, 7:30 and 9:30 p.m.

Made with the co-operation of the U.S. Navy with air scenes never before shown—never to be forgotten. A great star, Ramon Novarro in an epic of the air, "The Flying Fleet," at the movies, Didsbury Wednesday, October 9, 8:30 p.m.

**WHAT OTHER EDITORS  
ARE SAYING****THE ENGLISH SPARROW**

A recent issue of The Canadian National Parks points out that about forty years ago the first dandelions appeared in a Western city and were allowed to thrive. We know what a nuisance they have since become. It is recalled that crows were numerous during the days of the buffalo and almost disappeared with the monarch of the plains. They, however, adapted themselves to changed conditions and are now a serious pest as grain eaters and destroyers of game birds' eggs and young. No stringent measures were taken to keep their numbers down and they now present a serious problem.

So it is with the English sparrow, first introduced as an insect eater. They are noisy and quarrelsome, most untidy and delight in destroying the nests and eggs of insect-eating birds. They are pugnacious invaders of song-birds' nests, and only the larger birds, such as the purple martin, can contend with them. It is estimated that they double their numbers each year.

The suggestion is made that during the winter months, when other birds have flown south, that poison grain and other means should be used to destroy them. At one time Australia could have checked the rabbit pest, it is said. The English sparrow cannot, of course, be placed in the same class for destructive qualities, but they are among the unwanted of the bird species.—Camrose Canadian.

the progress of civilization, on new comforts made available to mankind on the fashions and vogues of the day, on where to buy the best of what they want at the most advantageous price, and furthermore for the same reason that they read the front page the feature sections, the financial page and the sports news—because they are interested.

Mr. Bill McFarquhar was a visitor to his home in Calgary over the week end.

Mr. George Julien left on Tuesday by motor for Sullivan Lake in quest of wild geese.

Mr. and Mrs. Cliff Bellamy and family motored to Calgary on Saturday spending the week end with Mr. and Mrs. Harold Clemens.

Mesdames Gabel, Burkholder, Reiber, Bercht and Newton and Miss Rena Honey are delegates to the W.C.T.U. convention being held in Calgary this week.

The seventh annual stocker and feeder show and sale will be held at the Alberta stockyards, Calgary, on October 21-22. Four thousand dollars in cash prizes. Auction sale starts at 10 a.m., October 22.

At the regular meeting of the Village council, held recently, a by-law was read which states that no buildings will be allowed to be erected in the Village of Carbon under the cost of \$1200. This by-law will not be put in effect on the "island." —Carbon Chronicle.

**Burnside Notes**

Mr. and Mr. Charlie Welch of  
Calgary motored up on Sunday to  
visit Mr. and Mrs. Fred Thompson  
of the Elliott Ranch.

Mrs. E. H. McAllister and Mrs.  
Peter Liesemer are attending the  
Provincial W.C.T.U. convention in  
Calgary this week as delegates from  
the Jutland branch.

The Lone Pine W.L. will meet on  
Thursday, October 10 at the home  
of Mrs. N. A. Eckel. Mrs. Mardon  
will take the topic "Child Welfare  
and Public Health."

Miss Mary Dyck who is teaching  
at the Huntelife School, spent the  
week end at her home here.

Miss Tena McLean left on Tues-  
day to enter the General Hospital,  
Calgary, to train for a nurse.

Burnside U.F.A. will meet in  
the Lone Pine Hall on Monday evening,  
October 14.

There will be a dance in the  
Lone Pine Hall, Friday evening,  
October 4. Bellamy's orchestra.

Mr. Joe Davidson, who has been  
spending the summer near Pen-  
hold, returned last week to his  
home here.

Mr. Joseph Beanchi who has  
been visiting his daughter, Mrs.  
Bert Gross, has gone to Oyama, B.C.,  
to visit another daughter, Mrs.  
Orris Hemling.

We are glad to report that Mr.  
Abe Dyck's children who have  
been very ill are all slowly improv-  
ing in health.

**GLIMPSES FROM THE PAST**

**15 YEARS AGO**

A permit has been issued by the  
town to the Alberta Government  
Telephone system to allow them to  
use the small frame building on  
their property on the corner of Os-  
ler and Shantz avenue, for a tele-  
phone office until next summer.

A heavy snowstorm visited the  
district on Saturday which stopped  
threshing and building operations.

**10 YEARS AGO**

A fatal drowning accident took  
place on Mr. Vipond's farm, west  
of town, when his little grandson,  
Baby Kudbeck, was discovered  
in the horse trough in which was  
about a foot of water.

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Marcus, the famous Broadway revue producer. Al insists on helping Molly, the ballad singer at Blackie's, because he loves her. Molly marries him, not loving him, and he pulls her up the ladder of fame. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowing it, is left behind. Molly has a baby. After her return to the stage her romantic interest in John Perry, Al's best friend, is revived. Al becomes part owner and master of ceremonies at the fashionable Club Bombo. On the third anniversary of their marriage he slips a jewel case under a napkin on her reserved table. Molly is in her limousine with John Perry on the way to the club. He pleads with her to throw over Al for him and suddenly kisses her.

### CHAPTER XIII.

Brimming over with affection, Al greeted Molly as she entered the Bombo Club. Then he turned to Perry and said whole-heartedly:

"Awfully good of you, old man, to take care of Molly while I'm working."

Perry had turned away to see if any vestiges of Molly's face powder still remained on his coat. Satisfied that he was safe, he turned his coat, hat and stick over to a check girl and acknowledged Al's thanks with an appearance of sincere cordiality.

They passed into the main dining room, Al leading the way. As they moved toward the reserved table, bewildering and contrasting thoughts flickered through Molly's mind. What a strange whirlpool of emotions had sucked her down! She felt the light caressing kiss that Al had given her in greeting still on her lips, but behind it, and much more intense, was the recollection of John Perry's embrace.

Now Molly and John Perry were seated at the table, while Al remained standing, watching his wife with intense curiosity. Why did he do that, she thought. Did he suspect something?

Al was waiting for her to lift her napkin. When she leaned back in her chair and made no move to do it he pantomimed definitely for her to look under the tiny square. Molly raised the napkin, saw the jewel case and card, and gave a cry of delight.

"Oh Al, this is wonderful of you!"

With eyes sparkling she tenderly lifted from the padded silken interior of the box a magnificent diamond brooch. She drew it close, held it at arm's length, studied it carefully—while Al's face was radiant at her expression of delight. Then she passed it to Perry for inspection.

## Corns INSTANT relief! PUTNAM'S Corn Extractor

W. N. U. 1803

A moment later she was pinning the expensive brooch to her dress, while Al turned and drew the attention of the crowd toward him.

"Folks," he said, "we have with us tonight none other than Molly Winton, the celebrated stars of the 'Merry-Go-Rounders.'"

Then, with a proud gesture, he indicated Molly. Rousing applause was the answer of the crowd—a tribute to the girl's popularity. But Al raised his hand.

"Wait, folks!" he cried. "You ain't heard nothin' yet."

He seized Molly's hand and pulled her reluctantly to her feet. While she stood smiling and bowing to the audience he continued:

"And for the benefit of those of you who don't know it already, I want to say that Miss Winton is, in private life, my wife! Tonight we are celebrating the third anniversary of our marriage and—I want you all to congratulate us and be happy with us."

With that, Al suddenly slipped his arms about Molly, drew her close and kissed her. The roar of applause was deafening, twice the volume Molly received by herself. As she stood, with Al's arm around her waist, bowing again and again, there were insistent cries from the crowd that she give them a song. Molly nodded amiably.

"Will you sing for them, honey?" whispered Al.

"Yes, I don't mind."

Al tucked his arm comfortably under Molly's and led her toward the orchestra platform. The crowd waited silently, giving her every attention. At the table she had left, John Perry sat with his elbow on the table and his chin in his cupped hand, staring after her retreating figure. A vague smile played across his features. When the song was finished and Molly returned, Perry rose and said:

"That was splendid, Molly! I never heard you in better voice. You held them in the hollow of your hand."

"Thank you, John," said Molly quickly, but with pretended indifference. Then she turned to Al: "Can't you sit down and stay with us a while. Must you always be circulating among the customers?"

"I'll be back in a moment," whispered Al. "You know I want to be with you every moment I can. But, after all, I'm master of ceremonies."

Molly shrugged her shoulders as he moved off. She had made her play for him to stay, but she was pleased he had gone off. Now she could talk to John.

"And you say you need him?" came Perry's whispered exclamation across the table.

"What do you mean?"

"Well, you heard the applause you got. You don't need him at all."

"Sh!" Molly drummed on the table-top without further words. The pink, polished nails of her white, bejeweled fingers went up and down with incredible rapidity. Too many rings on those slim fingers, too many glittering gems to be in the best of taste! How stridently they proclaimed her wealth and success! Molly glanced down at the brooch Al had just given her, as it reposed against the satin bodice of her gown. A few days before she had mentioned casually that she wanted a new brooch. Now—presto—it was hers! But now, a few moments after Al had given it to her, it became just another costly ornament to add to her rich collection; the significance of the gift was lost on her.

A half hour passed, and Al returned to the table. Another half hour, and John Perry rose to go.

"Fraid so," John answered. Now he was the one who thought of caution; he wished she wouldn't show her feelings so plainly before Al.

"Why?" she insisted. "I thought you'd run home with us for a while."

"Well, it's late for one thing. Besides, Molly, this is your anniversary. I know you and Al want some time alone together."

Perry spoke with the utmost gravity, but Molly thought she detected a sardonic gleam in his alert eyes. He was making fun of Al, and of her, too! For a moment she hated him for it. . . . But a moment later, when Perry had gone, she hated Al for creating the situation. Her thoughts, which had been bewildered, turned bitter. Anniversary indeed!

The Rolls-Royce sped rapidly toward home, with Molly keep-

ing silent the whole way. Al, believing she was tired, remained mum, too, out of deference to her mood. When they entered the reception hall of the apartment Molly curtly dismissed the maid and Al rushed off to the nursery, to see if Junior was sleeping.

The eyes of the young song-writer lit up with love for his baby son as he tip-toed across the nursery floor and surveyed the child, tucked safely away in bed. What a lovely picture Junior made, his mass of curly hair framing his delicate young face, his toy woolly dog nestled beside him on the pillow.

As Molly entered she was struck by the scene. The expression on Al's face told more plainly than words his complete love and utter devotion to Junior. For a moment she remembered her behaviour of the evening and a throb of misgiving shot through her. She was unworthy and she couldn't hide it from herself. Only a great, unselfish love could give Al's face the expression of radiance it held now. She knew she could not achieve such a love and, suddenly, the realization brought a surge of furious anger within her!

(To Be Continued.)

### Proposed Nicaraguan Canal

The fate of the proposed Nicaraguan Canal, stretching 183 miles through tropical mountains and forests from the Atlantic to the Pacific ocean, will depend on reports from a battalion of 400 engineers who were recently ordered to duty in the central American jungle to survey the route of the \$1,000,000,000 canal.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

**Fortune-Teller:** You will suffer poverty until you are thirty-five years old.

"And then?"

"By then you will have got used to it."

**A DOZEN** different things may cause a headache, but there's just one thing you need ever do to get immediate relief. Aspirin is an absolute antidote for such pain. Keep it at the office. Have it ready in the home. Those subject to frequent or sudden headaches should carry Aspirin in the handy pocket tin. Until you have used it for headaches, colds, neuralgia, etc., you've no idea how much Aspirin can help. It means quick, complete relief to millions of men and women who use it every year. And it does not depress the heart.

Aspirin is a trademark registered in Canada

### Fallacies About the Moon

#### When Not Visible Kaffirs Say It Has Headache

The Dakota Indians think that the moon at its waning is eaten by mice. The Polynesians believe it is devoured by the spirits of the dead. The Kaffirs say that it wanes when, suffering from a headache, it puts its hand to its forehead and hides the latter from our view. The Eskimos imagine that the moon, harassed by fatigue, retires for a moment to take a rest and food.

### A WARNING TO MOTHERS

#### Watch the Health Of Your Little Ones At All Times

No mother can expect that her child will escape all the ills to which babyhood and childhood are subject, but she can do much to lessen the severity of these troubles. The mother should be constantly on her guard to prevent childhood ailments, or if they come on suddenly as they usually do, to have the means at hand to relieve them. Thousands of mothers have found Baby's Own Tablets the ideal remedy for little ones—thousands of mothers always keep the Tablets in the house as a safeguard against the sudden illness of their little ones.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels; sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fevers and make the cutting of teeth easy. The Tablets are absolutely guaranteed free from injurious drugs and may be given to the youngest child with perfect safety. They are sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Little Helps For This Week

"In Thy presence is fulness of joy." Psalm xvi. 11.

O Friend of souls! 't is well with me Whene'er Thy love my spirit calms;

From sorrow's dungeon forth I flee, And hide me in Thy sheltering arms.

The night of weeping flies away Before the heart-reviving ray Of love that beams from out Thy breast;

Here is my heaven on earth begun; Who were not joyful had he won

In Thee, O God! his joy and rest.

—Wolfgang Dersler.

We can even here be with God, so long as we bear God within us. We should be able to see without sadness our most holy wishes fade away like sun-flowers, because the sun above us still forever beams, eternally makes new and cares for all. And we must not so much prepare for eternity as plant eternity in our hearts—eternity serene and pure, full of depth, full of light and all else.—Jean Paul Richter.

### Education For Labor

#### Inauguration Of Workers' Educational Classes Is Advocated In Manitoba

Inauguration of workers educational classes on lines similar to those which he said were flourishing in Great Britain, Australia, New Zealand and South Africa, was urged by R. J. Hall, of Swansea, Wales, at a conference with prominent Manitoba educationalists, labor leaders, and government officials held at Winnipeg. Mr. Hall is a promoter of the scheme in the old country.

Hon. R. A. Hoey, provincial minister of education, thought it possible his government might be interested.

Stop Colds with Minard's Liniment.

### Use Of Radium

#### Complete Potency Of Radium As a Cure For Cancer Not Substantiated

Warnings against undue optimism were sounded at the sixth annual meeting of the British Empire Cancer Campaign, presided over by the Duke of York. Sir Thomas Horder, physician in ordinary to the Prince of Wales, and physician to St. Bartholomew's Hospital, in presenting the annual report, said that the launching of the National Radium Fund might create in the minds of many people an unfounded belief in the complete potency of radium as a cure for cancer. Such a belief might have very unfortunate results for the patient if carried into practice in any case in which the growth was completely removable by operation. In the course of time radium might come to equal or even exceed operative measures in efficiency. At present, however, it was the bounden duty of the doctor, in very many cases, in his patient's interest, to overrule his antipathy to surgical measures. All the same, the number of cases to which radium was applicable and the number in which brilliant results were achieved increased every year. But Sir Thomas added that it was open to considerable doubt whether many of the institutions that were advertising for money to purchase radium had upon their staffs men or women qualified to use it. It might even be necessary to employ some of the money collected in providing for such training in the use of a powerful but dangerous remedy.—Toronto Mail and Empire.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

An essayist has discovered that two can live on three hundred pounds a year; but he omits to say two what.

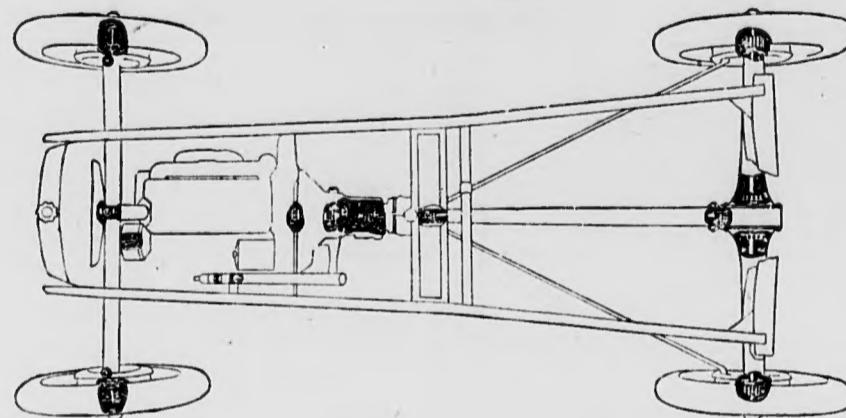

### Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work as I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."—Evelyn Bourque, 132 Alma Street, Moncton, New Brunswick.

# 24 Ball and ROLLER Bearings

**Reduces Friction  
and Makes for  
Ease of Operation**

LAVISH use of ball and roller bearings in the Ford car greatly reduce friction and contribute to easier operation and longer life of the car. Note the coasting ability of the Ford car as compared to any other automobile in its weight class.

Examination of the chassis will at once show the advantages of these bearings. On the rear axle pinion and differential all the taper roller bearings are held to such close limits that adjustment is unnecessary, pinion and ring gear always being held in proper mesh.

Spiral roller bearings are used in the rear hub because of their large bearing surface and ability to carry heavy loads. One is also used on the drive shaft at the universal joint end, to assure perfect alignment.

Taper roller bearings in the front wheels have a simple adjustment. Roller thrust bearings on the spindle bolts make for easy steering. Two bearings, one above and one below, take up the thrust on the steering worm.

The fan shaft operates on a roller bearing. The generator, the transmission, the connection between the spline and drive shafts, the clutch, the flywheel—all these important parts are made more efficient and enduring through the use of ball and roller bearings.

These bearings form a striking illustration of the engineering skill and care used in building the Ford car.

## Notice to Threshermen

Owners or operators of threshing machines and combined harvesters are required to have their machines registered with the Department of Agriculture and to send the Department at the end of the threshing season a return showing the number of acres and number of bushels threshed. This applies whether the machine is to be used for custom work or only for the owner's crop.

Special forms for these returns may be secured from the  
PUBLICITY BRANCH,  
Department of Agriculture

Edmonton

### HERE AND THERE

Few souvenir-hunting travellers have bagged as fine a prize as Viscount Willingdon, Governor General of Canada, who was presented with one of the biggest Totem Poles on the Pacific coast during his recent cruise in the Princess Norah, latest addition to the fleet of the British Columbia Coastal Steamship services of the Canadian Pacific Railway. His Excellency was given an insight into the activities and potentialities of Vancouver Island and was much impressed by the beauty of the coastal scenery.

A party of immigrants who within a short time are expected to multiply in large numbers and become thoroughly Canadianized, arrived in Montreal recently via the Canadian Pacific Express. They were rabbits—brown rabbits—sent from Germany to points in Ontario for breeding purposes. They appeared to be none the worse for their long journey and constantly nibbled at lettuce offered them by admiring expressmen.

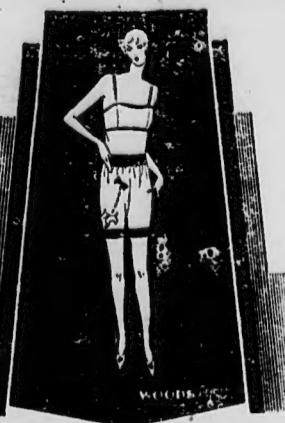

It won't be long now. A farm in the Eastern States was recently seeded by airplane in less than two hours. The plane flew about 500 feet from the ground and the seed was fed through an open door in the cockpit. The despatch does not state the nature of the seed, but it does indicate the trend of the times.

### ALBERTA STEAM LAUNDRY

Twice a week service  
MONDAY and THURSDAY

Laundry-Dry Cleaning-Dyeing

Local Agent:  
H. Hawkes Grocery  
Phone 134 Didsbury

They call this BREVITY  
RATHER DOGGY

Isn't it doggie—this new princess-type Brevity Knicker! The little terrier is in smart French applique, and comes in several colours, matching his bow and the smooth bandings on the waist and knee.

We can show you many other Woods Brevities in our Underwear Department. Won't you come in and see them?

"Of course, with the Woods Brevities you should wear the new Lavender Line extra long, pure silk, full fashioned hose."

Didsbury, Alta.

### WESTCOTT W.I.

The Westcott W.I. held their September meeting at the home of Mrs. Martin Jacobsen. The topic for the afternoon, "Education and better schools," was taken by Mrs. A. M. Robertson. A considerable part of the time was spent in making plans for a chicken supper to be held on Friday, October 25th. Watch the Pioneer for particulars. A report of the Institute convention held in Carstairs was given by Mrs. Webster. The next meeting will be held at the home of Mrs. A. M. Robertson.

With a 60 per cent increase in acreage over last year, and 3500 acres to be harvested for 1929, the sugar beet harvest began Wednesday last in the Taber-Barnwell irrigation district.
